Consent for Surgery/Anesthesia **Down Moss**
Date: **10/4/2022**

Owner Name: **Valkyrie Fox (CSAB) Valkyrie**
Animal Name: **Valkyrie**

Payment for Sulphur River Vet Services is due in full at time of discharge

Please read carefully and sign for your benefit and the safety of your pet, please be aware of the following:

1. If any external parasites (fleas/ticks) are on your pet prior to surgery, we will treat appropriately and charge accordingly. If your pet is in heat or pregnant, there will be an additional fee.
2. Because anesthesia affects each animal differently, there could be complications which would require special treatment and care. These procedures could lead to additional expense.
3. Like in human medicine, there is a remote possibility that your pet could have complications which results in death. With full understanding of the above, the undersigned owner/agent authorizes Dr. Denise Fowler and staff at SRVC to perform, under any anesthesia deemed advisable, said operation/procedure. I consent to those procedures, their additional cost, and any unexpected lifesaving emergency care deemed necessary.

I understand that risks and potential complications exist with anesthesia and surgery. These include, but not limited to: Abnormal reaction to anesthetic agents, self-inflicted injuries during anesthesia recovery (i.e., fractured legs, head trauma) muscle and nerve damage, dehiscence of incision, colic, post-operative infection, equipment failure, and death.

Pre-Anesthetic Blood work

I understand that anesthesia always carries risks. Blood work is highly recommended before general sedation, especially in geriatric patients. The anesthetic agent is removed by the body's liver and kidneys; therefore, it is important to know that these organs are functioning efficiently before anesthesia.

Yes, I accept blood work for additional \$95.00 No, I understand the risks and decline bloodwork.

Cold Laser therapy

Cold laser therapy reduces pain, inflammation, and promotes a healthy healing process of incision site.

Yes, I accept laser therapy \$25.00 No, I do not accept.

Would you like your pet microchipped for additional \$45.00 Yes No
